Neohance®

Rethink, Optimize Industrial Automation

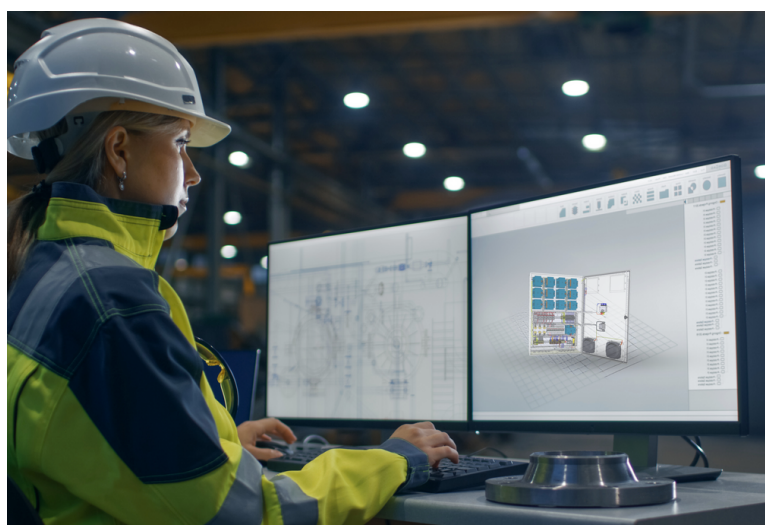

Engineering Services

Discover unparalleled engineering services at Neohance, where innovation merges with precision to reshape the industrial landscape. Our extensive range of engineering solutions is designed to elevate your industrial automation systems to new heights, ensuring optimal performance and efficiency in every facet of your operations. Our expertise in industrial automation systems, electrical and pneumatic control systems, measurement and control systems, and process instrumentation guarantees precision and innovation in every phase of each project.

- Industrial System Design
- Instrumentation
- PLC-SCADA
- HMI
- Electrical Panels & Control Cabinets
- Commissioning
- Network & Communication
- Upgrades & Optimization
- Process Improvement

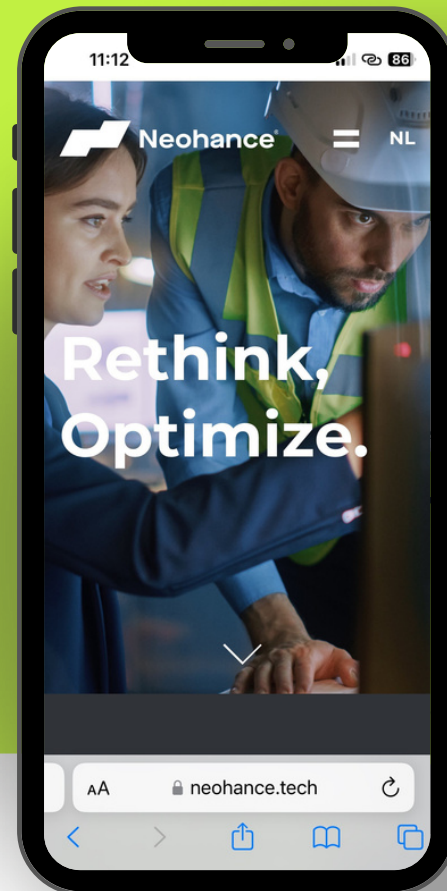

Services

The seed of Neohance sprouts from an ingrained vision to harness innovative technologies, not only to optimize industrial processes but also to positively impact the environment and enhance global human well-being.

Neohance is more than just a name; it embodies the vision of advancement and enhancement. The name is composed of the Greek word "*neo*," meaning "new," and the English word "*enhance*," which signifies the act of amplifying, strengthening, and improving something.

This name reflects the core values and goals of Neohance, which is centered around innovation and growth.

Maintenance services

At Neohance, we bring a wealth of expertise encompassing the entire spectrum of industrial operations. From the initial stages of designing and building advanced solutions to the seamless installation and ongoing support, our commitment is unwavering. Our expertise in industrial automation systems, electrical and pneumatic control systems, measurement and control systems, and process instrumentation guarantees precision and innovation in every phase of each project.

- Periodic Maintenance
- Calibration & Certification
- Troubleshooting & Diagnostics
- System Optimization
- Safety Inspections and Compliance
- Repairs & Problem Solving

Software solutions

- System Design & Engineering
- MES (Manufacturing Execution System) Implementation
- Databases & Data Integration
- Cybersecurity
- Data Analysis & Reporting
- PLC-SCADA

Consultancy & Training

Our experienced experts provide tailored advice to enhance various aspects of your operations, emphasizing compliance, resilience, and strategic growth.

Training:

Gas Detection: Learn the latest technologies and optimal safety measures for gas detection.

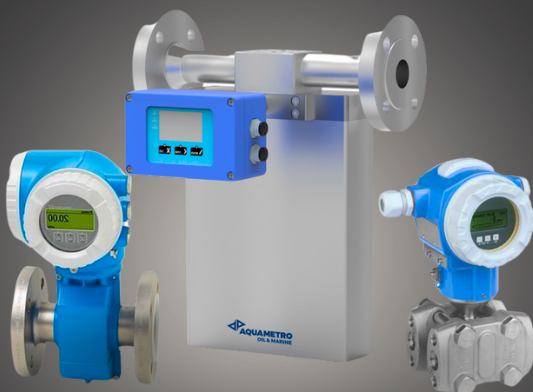

Calibration Process Instrumentation: Develop skills for calibrating process instrumentation, optimizing systems for accurate measurements, and ensuring reliable performance.

Our approach provides your organization with a clear advantage in talent development. We foster the formation of a dynamic and skilled team ready to comprehend the continually evolving trends in the industry. By strategically investing in the growth of your workforce, Neohance aims to prepare your team for the challenges of tomorrow.

Process Instrumentation & Industrial Automation

Products

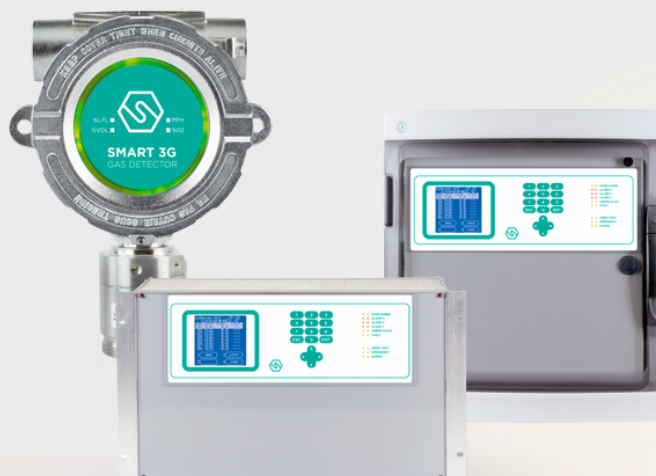

Whether it's energy-efficient systems, renewable energy integration, or reducing your ecological footprint, our expert team is ready to guide you. From planning to implementation, we support your efforts for CO2 reduction, aiming to advance a sustainable future through innovative, reliable, and cost-effective solutions. Choose Neohance: the key to energy efficiency – together, we reduce CO2 usage and redefine sustainability.
